HAND AMENDMENTS TO UK AIC

- AIC P 053/2020** - INSTRUMENT PRESSURE SETTINGS IN CONDITIONS OF ABNORMALLY LOW ATMOSPHERIC PRESSURE. **Paragraph 4 e to read as follows - When approach operations require to use Barometric Vertical Navigation (Baro-VNAV) equipment it is essential that the procedure is only considered if the actual QNH/QFE, as appropriate, can be set on the aircraft's altimeter. If the actual QNH/QFE is, or predicted to be, below the minimum equipment setting, then the procedure must not be planned or used.**
- AIC P 127/2006 (Pink 110)** - TAKE-OFF, CLIMB AND LANDING PERFORMANCE OF LIGHT AEROPLANES. **Paragraph 8.4 has been completely replaced with: Operations from strips covered in snow, slush or extensive standing water are inadvisable, but should not be attempted without first reading Safety Sense Leaflet 7C and The Skyway Code.**
